Linda Bengtsson

TL;DR:
Design engineer with full-stack skills and a focus on frontend and UX. Driven by taking apps and websites from idea to launch. Experience in both digital process optimization and an international internship.

Tech Stack

• **Frontend:** React, React Native, TypeScript, Next.js, JavaScript, SCSS, Framer Motion

• **Backend & Database:** Node.js, Express, REST API, SQL, MySQL, MongoDB, Prisma

• **Design & Tools:** UX/UI, Figma, Sanity CMS, Git, Docker, AWS

Experience

Internship – Graphic Designer & Developer | G-W Studios, Remote (Aug – Dec 2026, ongoing)
– Creating visual identities and web design for international clients.

Internship – Frontend Developer | Woolly Mammoth, Sydney (Oct – Dec 2025)
– Designed and developed a custom real-time TV dashboard (Next.js, TypeScript, Framer Motion).
– Integrated the Harvest API and Sanity CMS for time budgets and employee profiles.
– Result: Simplified budget tracking at the office and an offer to extend the internship.

Selected Projects

Film Roulette: Movie picker with a shuffle feature, filters and streaming info.

- **Tech:** React Native, TypeScript, Expo, TMDB API
- **App Store:** Film Roulette: What to Watch
