Åre

Professional Summary:
Frontend Developer based in Åre with a strong focus on UX/UI design. Passionate about creating smart, aesthetic, and user-centric web solutions and mobile applications.

EXPERIENCE

Frontend Developer (Internship) | Mammoth Tech, Sydney
3 months, 2025

- Designed and developed a custom internal tool.
- Actively contributed to high-impact projects with results that led to a formal offer to return for a second internship period in 2026.

System Administration & Operations | Region Stockholm (SLSO) 2018 – Present (Currently on study leave)

- **Operations & Administration:** Managed system administration, order processing, master data management, logistics, and procurement.
- **Digital Process Optimization:** Acted as Team Lead with a solution-oriented approach to streamlining and improving digital workflows.
- **Cross-functional Collaboration:** Collaborated across departments to ensure seamless operations and efficient internal processes.

TECHNICAL SKILLS

Programming & Frameworks:
React, React Native, TypeScript, Next.js, JavaScript (ES6+), SQL, Modern CSS, SCSS, Material UI, Framer Motion, Gsap

Design & UI:
UX/UI Design, Responsive design, Prototyping in Figma

CMS & Tools:
Sanity, Git, Github, Figma, VS Code, Cursor, Postman

PROJECTS

Movie Roulette: Designed and developed a mobile application with React Native, Typescript and Expo go, fetching data from TMDB Api. Soon published on Google Play and Appstore.

Unit Converter: Designed and developed a unit converter for mobiles with React Native, Typescript and Expo go. Soon published on Google Play and Appstore.

Adrenalink: Lead Designer and UX lead for a specialized administrative system for a client based in Spain.

TV Dashboard Application: Designed and developed an internal project overview tool for Mammoth Tech. Built with Next.js and TypeScript, integrating data from the Harvest API with content from Sanity. Features a dynamic, animated interface using Framer Motion.

Portfolio Migration Currently migrating personal portfolio from React/JS to Next.js and TypeScript, utilizing Sanity as a flexible headless CMS/ page builder.

EDUCATION

Higher Vocational Education:
Frontend Developer Yrkeshögskolan i Borås, 2025 – Present

- Specialized in Frontend development (JS, React, TypeScript), Backend (Node.js), and Database technology (MySQL).
- Comprehensive training in UX/UI design and mobile app development (React Native).
- Practical experience through 24 weeks of integrated internships (LIA).

ADDITIONAL EXPERIENCES

Retail & Customer Service | ICA & Stadium Outlet 2014 – 2018

- Cashier and Department Manager roles. Demonstrated long-term reliability and responsibility in fast-paced environments.

Marketing & Events | Monster Energy Sweden 2009 – 2010

- Brand representation and event coordination.

Additional background includes experience within hospitality, spa services, sales, and tourism.
